

Spectrum Technology Platform

Version 2022.1.0 S01

Release Notes

This document contains information about Spectrum Technology Platform 2022.1.0 patch S01. You have access only to the modules you have licensed. To evaluate any other modules, contact your Precisely account executive for a trial license key.

Who should apply this update? This product update is for users of the Universal Addressing-Validate Address (US Processing) Module of Spectrum Technology Platform 2022.1.

Is this update required? This product update is mandatory.

Contents:

CASS Cycle N License Extended to August 1, 2023.....	2
Installation.....	2

CASS Cycle N License Extended to August 1, 2023

CDQE-96064 Validate Address will now run in CASS-certified mode for Cycle N until August 1, 2023.

Note: After applying the 22.1 CASS extension product update, create a new Universal Addressing Module (UAM) US Database Connection to reflect the extended USA Coding Engine expiration date (August 1, 2023). The previously added database connection will not update or show the extended date.

Installation

To install this product update, you must have installed Spectrum Technology Platform 2022.1.0.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and platform, see the [Spectrum Technology Platform Updates](#) pages.

Installing on Windows

Note: In this procedure, *SpectrumDirectory* is the folder where you have installed the Spectrum Technology Platform server (for example, `C:\Program Files\Precisely\SpectrumDirectory`).

1. Stop the Spectrum Technology Platform server.
To stop the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Stop Spectrum**.
2. Back up these files to a different location:

```
SpectrumDirectory\server\modules\c1p\lib\C1PCKDBX.acu
```

3. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software and release notes on the [2022.1.0 Updates](#) page.
4. Extract the contents of the ZIP file to a temporary location.
5. Extract the contents of the resulting ZIP file (`cdq20221s01.zip`) to the folder where Spectrum is installed (*SpectrumDirectory*).
Choose to overwrite the existing files.
6. Start the Spectrum Technology Platform server.
To start the server, right-click the Spectrum Technology Platform icon in the Windows system tray, and click **Start Spectrum**.

Installing on Linux

Note: In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server (for example, `/home/user/myuser/SpectrumDirectory`).

1. Source the `SpectrumDirectory/server/bin/setup` script.
2. Run the `SpectrumDirectory/server/bin/server.stop` script to stop the Spectrum Technology Platform server.
3. Back up these files to a different location:

```
SpectrumDirectory/server/modules/clp/lib/C1PCKDBX.acu
```
4. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software and release notes on the [2022.1.0 Updates](#) page.
5. Extract the contents of the ZIP file to a temporary location.
6. FTP the `cdq20221s01.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
7. Change to the directory where Spectrum Technology Platform is installed (*SpectrumDirectory*).
8. Untar the file using this command:

```
tar -xvf TemporaryDirectory/cdq20221s01.tar
```
9. Run the `SpectrumDirectory/server/bin/server.start` script to start the Spectrum Technology Platform server.
